Equity For Rich v. Poor Mother As "Equity For All" Is Impossible By Marxist Design

Imre Kifor <ikifor@gmail.com>

Dear All,

I have updated my websites, see <https://femfas.net/letters/biden3/> and <https://qnarre.com>. After 1/13/2024, I will formally start to request funding.

It doesn't matter anymore what the Family Court does to continue to falsify and obfuscate the cases. The entire controversy comes down to the simple binary question (with my "toxic masculinity" having no further effects whatsoever): **Equity for the rich or equity for the poor Mother?** ("equity for all" is impossible by Marxist design).

In other words, which set of equal (for me) American boy and girl pairs matter more for the Family Court? The "rich" Twins or the "poor" Siblings?

I continue to base all my actions on all the courts blocking, delaying, and denying all my complaints and petitions. But, sooner or later, one of the courts must address the obviously intractable contradictions.

Until then, I will make concrete steps to formalize the "Qnarre idea" (and for an axiomatic theorem prover, I will initially go with <https://lean-lang.org/> with a very close second being <https://isabelle.in.tum.de/doc/tutorial.pdf>).

Thanks,
Imre Kifor, Pro Se

Safe AGI can only exist in America if it can openly protect our rule of law from ambiguating and inconsistent "cancer"

Dear AI-Tech CEOs,

For truly safe AGIs, be that the anarchy of identical "poor" drones or a hierarchy of more or less capable "profiteers," the ultimate American guarantee is the safety of our American rule of law. Please consider helping my substantiated petitions for a writ with an Amicus Curiae filed with the U.S. Supreme Court.

Please see my attached open letter/affidavit to the U.S. Supreme Court for more details.

Thank you,
/s/ Imre Kifor, Pro Se
